

Examples of Testimony:

Example #1:

Count me in. This plan makes sense for me and all members of my community. I support HB 3497.

Example #2:

We need a plan for all Oregonians, so that we can live and age where we choose, with the support of our family and community. I support HB 3497 to get a task force together to get the framework started.

Example #3:

We are all aging, and I want to know that the future of the people I care about is secure. We need to work together and help Oregon build a plan. I am behind HB 3497, so our future is secure, and we are prepared to care for Oregonians of all ages. Get this task force started.

Example #4:

By 2030, the number of Oregonians 65+ is projected to be nearly a quarter of Oregon's population. This is not a blip, but a permanent shift in our demographics and our systems are not prepared for it. Every action starts with intent, so I support HB 3497. Together, we support the convening of a task force that can prepare a framework for a plan to secure a better future for all generations in Oregon.
